C-110

COFFEE BREWER

QUALITY COFFEE AT THE TOUCH OF A BUTTON!

THE DOUWE EGBERTS® C-110 COFFEE BREWER

is the perfect high-quality coffee solution for locations requiring a single blend of freshly brewed coffee.

The C-110 holds a single blend of regular or decaf coffee, plus hot water, and can be programmed to fit your needs:

- Set it to brew the same size cup or pot each time the button is pushed (for back-of-the-house usage)
- Set it to brew continuously until the button is released (for back or front-of-the-house)
- The two buttons can be programmed independently, so one button can be set to fill a pot while the other can be set to fill a single cup or flow continuously

With the Douwe Egberts® C-110, your coffee is always freshly brewed so the quality remains consistently high with no waste!

EQUIPMENT SPECIFICATIONS
